

General Product Information

Sprinkler Magician is Effective Against These Pests

Mosquito Magician

Currently Sprinkler Magician supplies a powerful natural concentrate called "Mosquito Magician." The concentrate has all natural ingredients but unlike many of our competitors we use no less than 6 active ingredients. Our concentrate is effective on the following insect pests:

Mosquitoes

Mites

Chiggers

Lawn Grubs

No-see-ums

Silverfish Crickets

Spiders

Fire Ants

Moths

Flies

Ticks

Chinch Bugs

Gnats

Fruit Flies

Palmetto Bugs

Concentrates for Other Pests

Sprinkler Magician is currently developing and testing concentrates that are designed to repel other animals that may be pests in certain areas. For example we are getting extremely good results with an all-natural Deer repellent currently being tested in the New Jersey area.

Deer

Snakes

Scorpions

Fertilizers

We are also releasing our own "Fertilizer Magician" liquid fertilizer to use with our dual reservoir model in early 2014.

Remember that the Sprinkler Magician system is a DELIVERY SYSTEM that can be used to deliver any Sprinkler Magician liquid based product to kill or repel any pests and also to administer fertilizer to part or all of the lawns and gardens.

Competitor Comparison

Why is Sprinkler Magician better than the competitors?

1. It simply works better

There are very cheap products that claim to handle mosquitoes and other pests. Most of them simply do not work to any real degree;

Bug Zappers [\$25 - \$100]

They simply don't work well on mosquitoes, but instead do kill good insects. A recent study done at the University of Delaware found that of the 13,789 insects caught there were a total of 31 biting insects out of 13,789 or 0.22%.

Propane Powered Machines [\$300 - \$745]

These have some measure of success but they are notoriously unreliable and have a high running cost due to needing Propane (\$25+) and also the lure chemical (\$15-\$30) every month, total cost of \$50+ as well as the hassle of filling the Propane and changing the lures. Their effectiveness is debatable as they emit a plume of CO2 gas which attracts more mosquitoes into the area than what was there to start with. Given that a human body is always more desirable to a mosquito, they are very hit-and-miss in their effectiveness. Also, many properties require multiple machines to adequately cover them.

Cheap Siphon/Pump Systems [\$200 - \$300]

These attach to your sprinkler system but are "dumb" and completely reliant on the operation of the sprinkler system. Most of the effectiveness is lost because a high percentage of the mosquito concentrate is washed off the plants due to the large volume of water being applied. It is not environmentally friendly because of this wastage. Also pesticide treatments cannot be run on demand as they are tied to irrigation events.

2. It costs less to buy and operate

Misting Systems [\$2500 - \$8000]

These do work but only reach the plants and not grass areas. The mixture is also prone to drift. Additionally, the cost is high - an installed system runs \$2500 - \$8000 depending on the property size. Misting systems also require a completely new and sometimes unsightly piping system to be installed all around the property as well as a large 55 Gallon black drum. They typically use toxic Pyrethrins instead of the organic ingredients that Sprinkler Magician uses. Pyrethrins are known to be toxic to cats and many species of fish.

3. It does so much more than the competitors' products

Sprinkler Magician is a patented, automated system that effectively controls a wide range of insect and other pests. It can also deliver other concentrates for fertilizing lawns and gardens. It is microprocessor controlled, and can run pesticide treatments on preset schedules, or on demand. It is completely safe and environmentally friendly. Being made in the USA, it also helps create jobs here in this country. Sprinkler Magician is extremely reliable, and does not have any parts that are prone to fail. Sprinkler Magician have not had a parts failure since we started selling the product.

Real Customers. Real Quotes.

The first thing that attracted me to Sprinkler Magician was we were actually able to use our backyard and our swimming pool without getting eaten alive by mosquitoes. The Mosquito Magician concentrate gets in where the mosquitoes live and sets up a barrier that they just won't get through!
 -Bill Beasley

We had an outdoor party last summer and guests kept commenting how they weren't getting bitten by mosquitoes. What's really great too is that the Sprinkler Magician is automatic, so I never have to think about it or worry about whether or not I turned it on. It just goes on its own and gives me a mosquito-free yard!
 -Joy Gendusa

For once in my life, I'm not getting bit. I can sit outside by the pool, grill or just sit in the sun, and the mosquitoes aren't there! I am happy. There are no mosquitoes in my yard or my house. I also like the fact that the ingredients are organic and all natural because I care about health. I have five grandkids that can finally play in my yard - mosquito-free and poison-free.
 -Dr. David Minkoff

It's your yard. Take it back with Sprinkler Magician!

Eliminate Mosquitoes Naturally

**100% Natural
100% Safe
100% Automatic**

SPRINKLER MAGICIAN

- » Disperses Mosquito Magician after your system's watering cycle, so the concentrate isn't washed away
- » Is 100% safe for kids and pets, but deadly to biting pests
- » Eliminates pests rather than just driving them away

Frequently Asked Questions

- » **How does it work?**
The machine hooks up to your existing sprinkler system and automatically disperses the organic concentrate across your yard at appropriate intervals. A high pressure pump injects the concentrate into the water stream so that it spreads evenly on all your plants and lawn. The system can be set to run preset schedules each week.
- » **Which pests does it eliminate?**
In addition to mosquitoes, it also eliminates gnats, no-see-ums, fleas, spiders, and most other biting insects.
- » **How do I install it?**
It can be installed into any sprinkler system in a few hours by a lawn care professional or handyman.
- » **How much does it cost?**
Retail price for the machine is \$1,595 (excluding installation). To treat an average size yard with a moderate-to-severe mosquito problem will cost approximately \$59/month for the Mosquito Magician concentrate.

MOSQUITO MAGICIAN

All-Natural, Organic Ingredients for the Control of Biting Pests!

- » Fast & Easy to Apply
- » Works Instantly
- » One Use Can Last Days

1 Quart of Mosquito Magician treats a:
 Small Yard (3000 sq. feet) — 2x per week for 5-7 weeks
 Medium Yard (5000 sq. feet) — 2x per week for 3-5 weeks
 Large Yard (8000 sq. feet) — 2x per week for 2-3 weeks

Sprinkler Magician - How it works

Sprinkler Magician turns any Sprinkler System into a Mosquito Machine.

Sprinkler Magician attaches to your existing Irrigation/Sprinkler system and injects specific amounts of 100% Organic Solution (Mosquito Magic) while running each zone for 40 to 90 seconds, depending on zone size. (Size measured by square footage)

The Machine gets wired into the Irrigation Timer and runs independent of your Irrigation Controls. You can set Sprinkler Magician to automatically run specified zones daily, every other day, twice a week or once a week depending on your needs. There is also a manual override button that can be used for special occasions (ie: Barbeques, Parties, etc.) without having the Machine turned on.

If you turn your Irrigation system off during the Rainy Season, Sprinkler Magician will still continue to run the scheduled settings for Mosquito Control. The zones only run for 40 to 90 seconds each, which does not affect landscape in a negative manner.

Sprinkler Magician treats the areas where the mosquitoes live (grass and plants) rather than misting areas several times a day while you entertain on patios, in pool areas, etc. Without treating Mosquitoes where they live they will keep coming back.

Water droplets from sprinkler heads insure the Solution is distributed to intended areas unlike Misting Systems, which can drift in the wind and then only benefit your neighbors.

Manually Spraying Mosquito Magic

The Mosquito Magic 100% Organic Solution can be sprayed manually through Garden Hose Sprayers or Hand Pump Sprayers purchased at any garden center.

Mosquito Magic Solution is available in 1 Gallon or 1 Quart Bottles.

One gallon can cover up to 128,000 square feet

One quart can cover up to 32,000 square feet

Just add 4 ounces of Mosquito Magic Solution per one gallon of water and apply it through a Hand Pump Sprayer or you may fill a Garden Hose Sprayer with straight solution and simply spray the intended area. You only need a light application for it to work, like spray painting the lawn and bushes. The Solution lasts up to 2 weeks depending on rain fall and lawn watering.

If you are tired of dealing with mosquitoes and looking for something that actually works, call us now for more information. It's time you take your yard back.
