NOTICE OF PESTICIDE APPLICATION

GRUB CONTROL & FERTILIZER
JULY 20 - 24th
FUNGICIDE as needed

Rainy, damp weather can lead to lawn fungus. Fungus Control - Will be applied at our discretion and is an additional charge. If you do not want this service please contact our office.

RAIN RAIN GO AWAY! I know that's what we've all been saying! With all the rain these past few months, I am hearing many of you have not even turned your sprinkler systems on! Warmer days will soon be here, please don't let your lawn and shrubbery dry out. Please water lawns and shrubbery for at least 20 - 30 minutes per section every other day. Water early morning or late evening to prevent evaporation. Should you wish to have your sprinkler system activated or serviced to ensure it is working properly please contact our office to schedule an appointment.

Have you considered a new patio, water feature or outdoor kitchen?

Let us create your very own "stay-cation" right in your backyard. We can transform your yard into your very own resort.

Interesting Facts

Lawns need 1" to 1 1/2" of water per week to stay green.

Plant a few sprigs of dill near your tomato plants to prevent worms on your plants.
